

What are some ways I
can make my
classroom more
diverse?

There are many ways to bring diversity into your center! Let's go over some ideas.

Read picture books that support diversity to your class frequently.

Use art projects to support the idea of diversity and individual interests.

Provide toys and dolls that are diverse for the children to play with.

Display pictures and posters with a variety of people including individuals with disabilities and a variety of nationalities.

Plan games and activities that teach children about other cultures.

Lastly, encourage children to ask questions about those who are different from them! The classroom should be a safe place to ask and learn.
